

YOUR HOME

ZOO AUTOMATION

it's one out of the box

The world of in home technology is a jungle! ZOO Automation is the place where the very best of the jungle comes together in one simple, easy to navigate environment.

Regain control of your energy costs and take your home from ordinary to extraordinary with ZOO Automation.

Skyrocketing energy bills and pressures for more environmentally sustainable living have inspired the development of ZOO Automation. An Australian designed home automation system, ZOO not only integrates intelligent, cutting edge technology into your home, it also allows you to monitor and manage energy use in your home and reduce your energy costs.

ZOO is the leader in home automation because it does what others have tried but failed to achieve, a hard wired retrofit system that costs no more than existing wireless automation technology. This means reliability is assured and that control over individual rooms, lights and appliances has never been better.

ZOO was designed because we wanted to give you as much control as you desire over your power use, saving you money whilst providing unprecedented levels of peace of mind when it comes to reliability and the safety of your family.

ZOO will add considerable value to your new or established home, help you reduce your energy costs and make you the envy of your friends and family.

ZOO Automation *Features*

Z climate control

Z lighting control

Z curtain & blind control

Z CCTV security

Z access control

Z media & entertainment

Z energy monitoring

Lighting Control

Create different moods in various areas of your home with lighting control. Set your lights to come on automatically when you arrive home from work, turn off lights that have been left on by the kids via your iPhone App. Manage your energy efficiently

Standby Power Control

Turn off all of your costly standby power with the touch of a button and create a safer environment for your family. ZOO turns off the power BEHIND the power point! Now that's control.

Energy Monitoring

Real time energy monitoring will allow you to see how much energy you use and how efficiently, as well as report on each individual appliance, any electrical faults or energy dips. Get peace of mind knowing your home is safe and cut costs by creating more efficient power usage habits.

CCTV/Security

Arm your home with a cutting edge CCTV security system. ZOO's unique remote monitoring functionality will let you view your CCTV feed and check on any tripped alarms, no matter where you are in the world. Check on children, trades people or pets and rest assured that your home and family are safe.

Access Control

Remote access to your home can be a very handy feature if you need to let in family who forgot or lost their keys, get a quote on some work or let in a cleaner. You'll never have to worry about leaving spare keys with anyone, and of course, manual overrides ensure you can always gain access to your home.

Curtain Control

Set your blinds to automatically adjust and help make your home more energy efficient by keeping the sun out or the heat in.

Climate Control

Manage air conditioning and heating at the touch of a button. Set it to come on automatically or turn off, ensuring your home is always at a comfortable temperature. Also, the ZOO iPhone App will allow you to activate commands remotely, giving you total control.

Media and Entertainment Centre

ZOO centralises your audio visual, media, gaming and entertainment to a single platform, enabling you to distribute movies to multiple rooms. One remote activates all your media and entertainment as well as the entire ZOO system.

ZOO Automation will help you control your energy use, secure your home and simplify daily tasks, all through the touch of a button on your smart phone, tablet or computer.

it's one out of the box

ZOO Automation *Benefits*

Easy to Install

ZOO Automation's behind the wall modules can be retrofit to any home, giving the average home owner access to luxury conveniences previously afforded only by the very wealthy. No rewiring is needed as ZOO utilises existing cabling infrastructure, with the exception of CCTV, and touch screen. As it is not a wireless installation, ZOO customers can rest assured that the system will not create additional Electro Magnetic Fields or interfere with their existing home WiFi networks.

Reduce Energy Bills

By controlling lighting and appliances, ZOO Automation can lower energy costs and extend the life of appliances. Energy costs are predicted to rise by 40% over the next few years, so minimising energy bills is high on every home owner's list.

Affordable

The retrofit nature of ZOO Automation means it is no longer an extravagant gadget, rather an affordable convenience that will aid home owners in managing their everyday tasks, as well as lowering their energy bills.

Reliable

The ZOO Automation system and components are all engineered and produced by a single manufacturer, ensuring maximum compatibility and dependability. Tested in extremely sensitive and demanding environments where failure was not an option, ZOO is a highly stable and reliable system. Manual overrides give customers peace of mind that they will never lose control or be locked out of their home.

Simple to operate

Even customers of limited technical ability will find ZOO Automation's intuitive touch screen operation easy and straightforward to operate.

Energy Monitoring

ZOO Automation's smart system determines how much power is being consumed by individual appliances and lights, as well as entire rooms. The system is also able to report how efficient the power usage is and how better to distribute it. Monitored in real time, the ZOO system can also produce historical reports on the home's energy consumption and efficiency.

Hassle Free upgrade options

Down the track, should you decide to add further features to your ZOO Automation system, simply contact your ZOO installer. With the exception of CCTV Security, no further wiring installations will be required.

Remote Access

Manage your ZOO Automation system from anywhere in the world through smart mobile devices like the iPhone and iPad. Just download the ZOO App and you can switch on the air conditioning before you get home on a hot day, get that load of washing going in off-peak energy slots, give tradesmen access to your home, watch CCTV footage or turn the lights on or off.

Desk Console

ZOO Automation *App*

Download the ZOO App

Manage your home from any location in the world with the ZOO iPhone App. Activate lights, your irrigation system or selected appliances with the simple touch of a button. View energy consumption reports or access your CCTV feed. ZOO brings together best of breed technology and energy efficiency for a truly inspired automation system.

Manage your home

Turn off lights from the shopping centre or the hair straightener that you left on from work with the simple touch of a button!

6 key control switch

Energy Monitoring
